**Subject:** Conversation with Wente, Stephen

Wagman, Michael 11:20 AM:

what's the Koc for aldicarb? Trying to get an idea of the extent of its systemicity

Wente, Stephen 11:22 AM:

The Kd is 0.16. It is systemic.

Wagman, Michael 11:24 AM:

How do Koc and Kd relate to each other? Or do we not have a Koc for it?

Wente, Stephen 11:25 AM:

A very high level approximation is that Kd is approximately 1/10th the Koc. Kd is not related to organic carbon whereas Koc is.

Wagman, Michael 11:26 AM:

Thanks that is helpful.
